

- Case study -

Implementation and roll out of a Pan European Data Platform for Supply Chain

LIBERTY GLOBAL

Background

Goal: Deliver a new data integration platform that enables Liberty Global to implement a Pan European Supply Chain planning organization and processes by harmonizing the data, processes and technology used.

Roll out the solution in 6 countries: Belgium, the Netherlands, Germany, United Kingdom, Switzerland and Austria.

The solution provided is a key driver for the harmonization of the business processes across the countries.

Devoteam's role: System Integrator and the delivery of Informatica based solution.

Challenges

- 1) Roll out of the solution with zero business impact as the planning process of stock items is one of the critical processes within business operations. Disruption of this process will have impact on the stocklevel.
- 2) Successfully manage and deliver complex solutions within a multi-country and multi-vendor organization.
- 3) Delivering within the aggressive timeline for each of the country.

Company name: Liberty Global
Branche: Media
Company size: 47,000

Solution

The delivered solution includes a new MDM solution, New Data Integration & Visibility Platform, Data replication and data integration layers. Solution was based on Informatica stack (MDM, Powercenter) and Oracle Golden Gate.

Data Integration between 6 different country ERP applications, MDM, and JDA Advanced Planning System.

Take full end-to-end responsibility in delivering the solution.

Our agile delivery approach ensure a close loop with business stakeholders and improve clarity on requirements

Used skills

- Master Data Management
- Data Integration & Visibility Platform
- Informatica Stack
- Oracle Golden Gate
- Agile approach

Client benefits

- Shared and harmonized business processes across the operating units in different countries.
- Enable business to plan and share inventory across the different countries reducing the inventory costs and 'out of stock' situation.
- Business benefits are lower costs and more efficient use of working capital.
